INTERVIEW SUMMARY

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

A telephonic interview was conducted on November 21, 2008 between Examiner Jonathan Foreman, inventor Christopher Dawes and attorney John G. Rauch.

The subject of the interview was the pending claims and the rejection of the application based on US patent number 6,865,410 to Kavet, et al. ("Kavet"). Claim 1 was discussed relative to Kavet. Applicants explained their asserted distinctions of the claim over Kavet. In general, it was explained that Kavet does now show a device able to "detect and measure a body own electrical current occurring at an acupuncture point on the user's body and to produce one or more biofeedback signals derived from the electrical current" as recited in claim 1." Claim 15 was also discussed with regard to the limitation "electrodes electrically isolated from the housing, the electrodes configured to contact the skin of a user and detect body emitted electrical

current signals at an acupuncture point on the body of the user without introducing an electrical signal to the user.”

No agreement was reached. Applicants agreed to reconsider the claims in light of the examiner’s explanation. The examiner will provide a subsequent action according to his schedule.

Applicants thank the attorney for his generous time and careful explanation of the rejection.

Respectfully submitted,

/John G. Rauch/
